On-Net Business (Mega Fibre) information

Axecom's Business Mega Fibre Service delivers high-speed Symmetrical Internet Fibre-to-the-Premises (FTTP). Axecom/Partners bandwidth speeds are guaranteed to the network termination port.

The actual speeds you will achieve could vary due to many factors including but not limited to, type/source of content being downloaded, hardware and software configuration, your local network equipment used, the number of users simultaneously using the network and performance of interconnecting infrastructure not operated by Axecom. Your local network equipment, the performance of your local infrastructure and cabling are not limited to the source and destination of content accessed via the internet. Devices connected by Wi-Fi may experience slower speeds than those connected by Ethernet cable.

On-Net Business Mega Fibre plans provide unlimited data usage however, a fair use policy applies that is designed to protect the integrity of the carrier network. Examples of a fair usage breach would include but not limited to, re-selling the Axecom On Net Fibre without written consent of Axecom, promote or threaten violence towards anyone, create a risk to the health or safety of any person, using your service in a way that interferes with or poses a risk to our network or other customer's services.
